EDUCATION

PAMANTASAN NG LUNGSOD NG VALENZUELA BS Information Technology	Valenzuela City 2026
Relevant Coursework: Data Structures & Algorithms, Software Testing, Operating Systems, Database Systems, Web & Mobile Development, Wireframing & Prototyping, Software Analysis & Design	
Organizations: Valenzuela Information Technology Society - Member Victoria Heartstrong Organization - Scholar/Volunteer	2022-2026
2023-2026	

WORK EXPERIENCE

INTERNSHIP IT Support/Admin Intern	DepEd - Schools Division Office, Valenzuela City July 2025 – October 2025
--	--

- Provided IT troubleshooting and technical support for office workstations, printers, and peripheral devices, diagnosing and resolving hardware and software issues in a Windows environment.
- Developed an Attendance and Visitor Monitoring System using Google Apps Script, TypeScript, and Google Sheets, digitizing visitor records and streamlining attendance tracking.
- Maintained and updated the Online Public Access Catalog (OPAC), troubleshooting system issues and ensuring accurate database records and reliable system availability for library users.
- Managed institutional data through data validation, encoding, and database maintenance using Microsoft Excel and MySQL, improving data accuracy and integrity.
- Assisted employees with basic technical issues, software problems, device configuration, and workstation troubleshooting to minimize disruptions to daily operations.
- Created digital communication materials and multimedia content using Canva for internal communications, documentation, and organizational events.
- Supported system documentation, workflow automation, and information management initiatives to improve administrative and operational processes.

PROJECTS

SALES PERFORMANCE DASHBOARD	August 2026
● Analyzed sales data using Microsoft Excel (Pivot Tables, XLOOKUP, Charts) and developed an interactive Power BI dashboard. Visualized monthly revenue, top-selling products, regional performance, and customer trends to support data-driven business decisions.	
EXPENSE TRACKER (Full Stack Web Application)	July 2026
● Built a full-stack expense tracking application using React, TypeScript, Bootstrap 5, Vite, Node.js, Express.js, PostgreSQL, Chart.js, Git, and GitHub. Implemented expense management, interactive spending analytics, and data visualization through responsive dashboards.	
VHO SCHOLARSHIP MANAGEMENT SYSTEM (Web Application)	June 2026
● Developed a scholarship management system using HTML, CSS, Bootstrap, JavaScript, TypeScript, Supabase, Git, and GitHub to digitize scholar records, document verification, announcements, and polls.	
LEAPIT CAPSTONE PROJECT (Website)	February 2026
● Developed a web-based student progress monitoring and recommender management system using PHP, MySQL, HTML, CSS, JavaScript, TypeScript, Bootstrap, Chart.js, and Figma. Implemented grade analytics dashboards, and performed manual testing to ensure system functionality.	
TECHTOTS (Educational Mobile Application)	December 2025
● Developed an educational mobile application using Angular, Ionic Framework, Firebase, and Figma to teach toddlers basic computer parts through interactive learning activities.	
TRAVEL BLOG WEBSITE (Web Application)	November 2025
● Developed a travel blogging platform using PHP, phpMyAdmin, HTML, CSS, and Bootstrap. Enabled users to publish, browse, and manage travel blog posts through a responsive web interface.
